180, 185, 186 AND 380 SERIES DRIVE AXLE PARTS FOR SINGLE AXLES AND TANDEM AXLES

PB-9108
Revised 10/08

HOW TO USE THIS CATALOG

- There are 11 basic carriers covered in this catalog:

3200-C-1381	3200-K-1753	3200-S-1839
3200-U-1399	3200-W-1791	3200-A-1899
3200-M-1625	3200-J-1804	3200-L-1910
3200-J-1752	3200-M-1833	

  Major assembly differences in a carrier are indicated by the different assembly level numbers in front of the base carrier number, for example, A1-3200-J-1804 and A4-3200-J-1804.

  NOTE: The carriers listed in this catalog do not include yokes. A yoke is a major assembly difference, so, a carrier sold with a yoke has a different assembly level number than the same carrier without the yoke.

- The charts for carriers, output shafts, and housings include the following information:
  - An expoded view of each assembly, keyed to the parts list.
  - A description of each part.
  - Parts that are sold as assemblies that include other parts.
  - Which carriers or axle models the part is used on.
  - The quantity of the part used on the carrier or axle.
  - The part number of each part.
  - Whether the part is available in a kit.

- **Carrier parts:**
  Determine which chart and figure (1 or 2) applies to your carrier by using the following sources of information.
  - Identification tag installed on the carrier.
  - Axle Models-Carriers-Features Chart.
  - Pictures and descriptions of the carriers inside the front cover and at the beginning of Chart 1 and Chart 2.

- **Output (thru) shafts:**
  This chart covers the output shafts for the forward axles of all tandems. Note that the output shaft assembly or its components are only sold as separate items. The output shaft is not included with the purchase of a carrier or housing.

- **Housing Assemblies and Wheel End Parts:**
  This chart covers the housing assemblies and wheel end parts for all axles. The parts are listed according to axle models that are used on 180 and 380 series axles.

- **Axle shafts:**
  The axle shafts are grouped in sets (L.H. and R.H.) according to the axle models they are used on. Many axle shafts are used on more than one axle model. The axle shafts are also listed by part number with dimensions.

- **Yokes and Flanges:**
  There are four charts that cover full round bearing yokes, wing bearing yokes, Easy Service yokes and flanges. Each chart lists the yokes or flanges used on each model, the yokes and flanges are listed by dimensions.

- **Kits:**
  The first chart in this section lists all the kits available for each model axle and carrier. Following that chart, the kits are organized in numerical order.

- **Numerical Parts Index:**
  This section lists every part number along with the page(s) on which the part is listed.

The part number supercessions listed here reflect product improvements made in several key areas. Several of these product improvements are non-interchangeable at the component level, in these cases kits have been developed to ease your transition to the new designs.

The rear-rear and single axle carriers with main diff. lock now have a screw-in type shifter.
The forward-rear carriers with pump now have an internal pump that is also used on the 145 and 160 family axles.
The forward-rear carriers also now have a screw-in type I.A.D. lock shift cylinder.

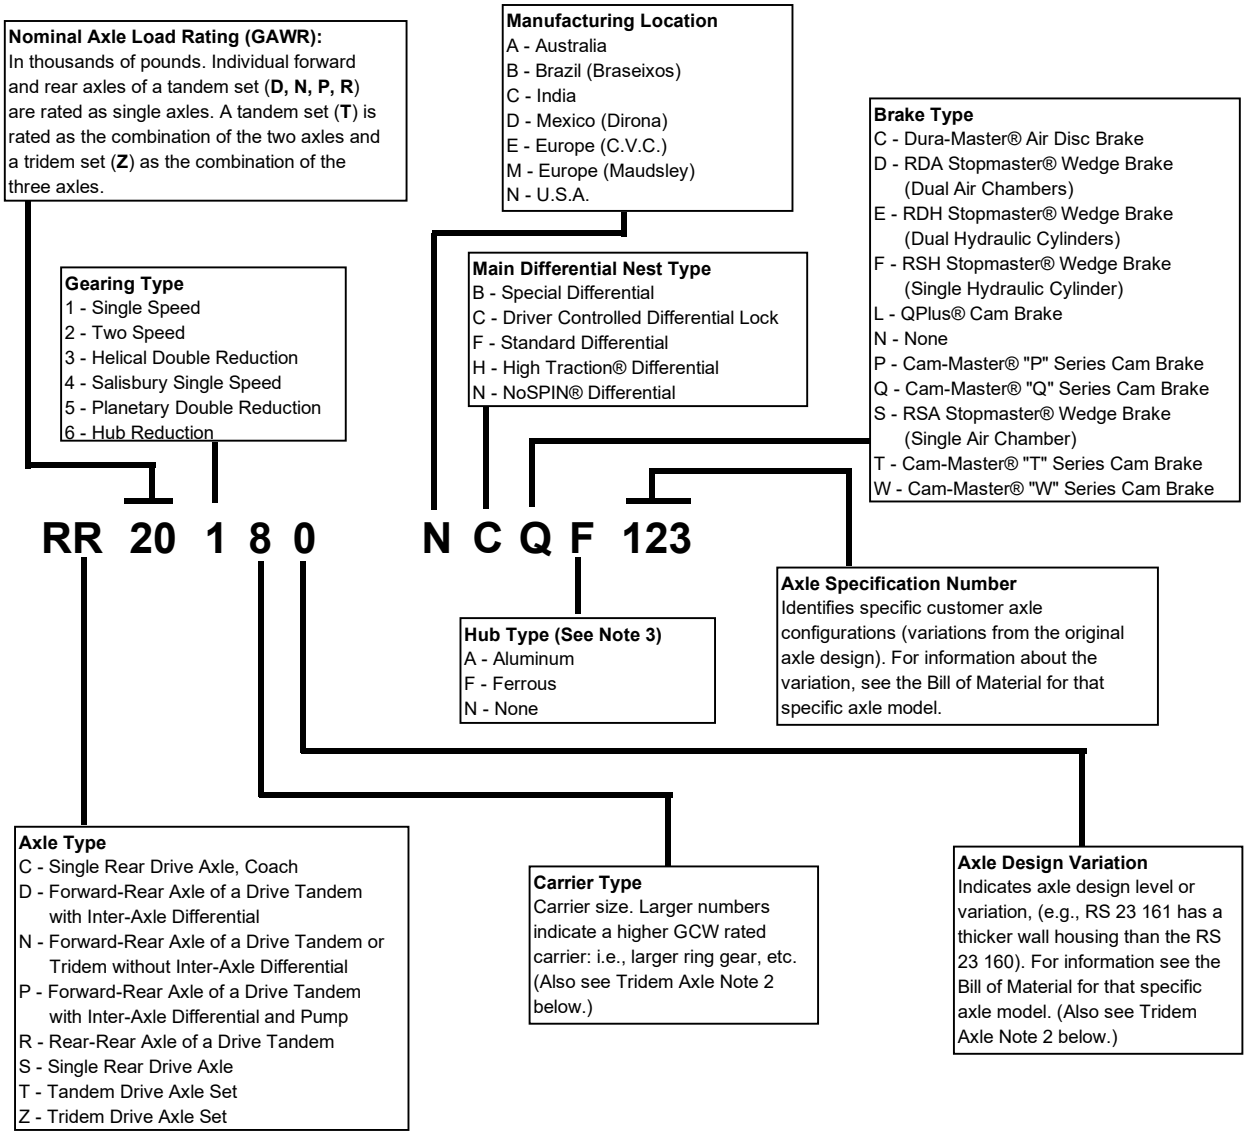
Rear Drive Axles

Model Numbers and Designations

Axle models are identified by a letter and number system. The letters and numbers give important information about the specific axle model.

The first seven positions of the designation identify a basic axle model, while the second group of letters and numbers identify particular specifications.



NOTE 1:
If a complete axle designation is not required, use the first seven positions of the model designation to identify the basic axle model.
EXAMPLES OF BASIC AXLE MODELS:

RS 17 140 - Single Rear Drive, 17,000 lb., Single Speed, 15" Ring Gear, 140 Carrier Model.

RT 48 380 - Tandem Drive Axle Set, 48,000 lb., Helical Double Reduction, 19.62" Ring Gear, 380 Carrier Model.

RZ 60 164 - Tridem Drive Axle Set, 60,000 lb., Single Speed, Includes a 150 Series Forward Rear or First Axle and a 145 Series Tandem Axle Set as the Second and Third Axles.

NOTE 2, FOR TRIDEM AXLES ONLY:
For a Tridem Drive Axle Set (**RZ**), the number in the sixth position designates the carrier in the first axle. The number in the seventh position designates the carriers in the second and third axles.

NOTE 3:
Some axle designations or specifications do not have a hub type code.

ARVINMERITOR AFTERMARKET PARTS WARRANTY

We warrant all new parts for one year from date of shipment to the buyer against defective material or workmanship (but not against damage caused by accident, abuse or improper installation, maintenance or repair) when such parts are used on vehicles the specifications of which have been approved by our Engineering Department.

As the exclusive remedy under this warranty, we will, at our option, repair or replace such parts free of charge, or take back the nonconforming parts and refund the monies paid by buyer for such parts, if found on examination by us to be nonconforming and if any necessary return charges are prepaid.

If it is necessary to return any parts under this warranty, buyer agrees not to make any deduction on account thereof from remittances on current accounts while claims are in the process of disposition. Any expense incurred without our consent for repairs or replacement will not be allowed.

THIS WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES OR CONDITIONS, EXPRESS, IMPLIED OR STATUTORY, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE. IN NO EVENT SHALL SELLER BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES OF ANY NATURE.

Only genuine ArvinMeritor replacement parts are covered by this aftermarket parts warranty.
