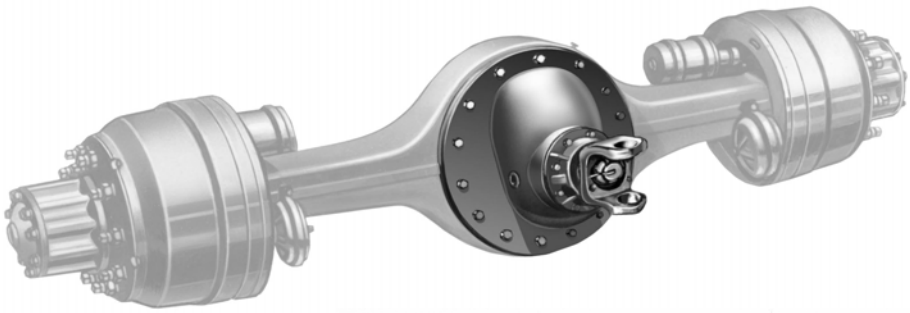
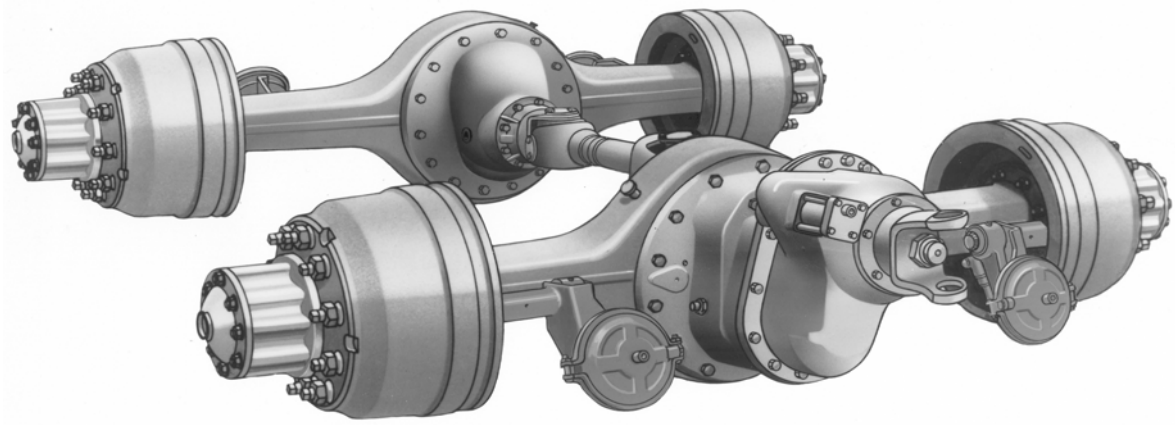
MERITOR
an ArvinMeritor brand

Revised 2/2006

Out of Production
Single Reduction Axles

Catalog PB-9424





Strength • Power • Speed • Agility

MERITOR PARTS. RIGHT FROM THE START.

HOW TO USE THIS CATALOG

- This catalog contains the most popular carriers for Single Reduction, Out of Production Axles. Major assembly differences such as traction equalizers, NoSpins, different differential nest assemblies, etc., are also cataloged. These major assembly differences in a carrier are indicated by the different assembly level numbers in front of the base carrier number. The axle carrier chart at the beginning of each model lists all the variations covered in this catalog.

  NOTE: The carriers listed in this catalog do **not** include yokes. A yoke is a major assembly difference. Therefore, a carrier sold with a yoke has a different assembly level number than the same carrier without the yoke.

- **SECTION 1 - The charts for carriers and housing components include the following information:**
  - An exploded view of each assembly, keyed to the parts list.
  - A description of each part.
  - Parts that are sold as assemblies that include other parts.
  - The carriers or axle models the part is used on.
  - The quantity of the part used on the carrier or axle.
  - The part number for each part.

- **SECTION 2 - Housing Components and Wheel End Parts:** These charts cover the miscellaneous housing components and wheel end parts and are sequenced by model number.

- **SECTION 3 - Axle Shafts:** The shafts listed in this section are sequenced according to model designation.

- **SECTION 4 - Drive Gear and Pinion Assemblies:** This section lists all gear sets and ratios by model designation.

- **SECTION 5 - Yokes and Flanges:** These charts cover full round bearing yokes, wing bearing yokes, Easy Service yokes and flanges used on each axle model. The yokes and flanges are listed by dimension by axle model.

- **SECTION 6 - Service Kits:** The kits are sequenced according to the kit number. The contents of each kit, the model designation and a brief description are listed.

- **SECTION 7 - NoSpin Part Number Reference Chart:** This chart lists the NoSpin part number for each corresponding axle model number.

- **SECTION 8 - Numerical Parts Index:** This section lists every part number and page(s) on which the part appears.

LOCATION AND IDENTIFICATION OF MERITOR AXLE SPECIFICATIONS

To correctly identify your axle model specification, there is an I.D. tag riveted on the rear of the axle housing. When ordering replacement parts be sure to specify the model number and the ratio number stamped on the I.D. tag.

SINGLE AXLE MODEL DESIGNATIONS

INDICATES AXLE CAPACITY OR SIZE:

C - 11,000 lbs.	RL - 20,000 lbs.
D - 13,000 lbs.	R - 23,000 lbs.
F - 15,000 lbs.	S - 26,000 lbs
H - 17,500 lbs.	U - 29-30,000 lbs.
L - 18,500 lbs	W - 36-38,000 lbs.
P - 20,000 lbs.	
Q - 22,000 lbs.	

TYPE OF DRIVE UNIT

1. Single Reduction
2. Double Reduction (Single Speed)
3. Double Reduction (Two-Speed)
4. Amboid Single Reduction
5. Planetary Double Reduction
6. Planetary Two-Speed

Number variation - indicate major design variation such as special spindle or axle shaft spline.

R - 1 7 0 -

1. Bus type wheel bearing (oversize inner wheel bearing).
2. Different carrier or housing (mix of standard parts). Same rating.
3. Open (was for axle with top mounted carrier).
4. Reserved for complete carrier redesign.
5. Was used for single reduction split type axle; also for 2 to 1 speed double reduction axle, but now it is used to indicate the single rear axle of a tandem (R-155 rear of SSHD).
6. Used to indicate a different carrier assembly than standard like No. 2, but after a redesign of No. 4.
7. Indicates a bigger ring gear version such as H-170 and R-170 axles.
8. Indicates an even bigger ring gear. Example: R-180 with 19-5/8" diameter gear.

NOTE: THREAD LOCKING LIQUID/DIFFERENTIAL CASE HALVES

When assembling differential case halves in Meritor axles, a thread locking adhesive should be used. The recommended procedure is as follows:

1. Wipe excess oil and residue from the threaded holes in the case. The holes should be relatively oil free.
2. If new bolts are being used, a yellow coating of Dri-Loc should appear on the threads. Assemble the case with these coated bolts to the required torque.
3. If the original bolts are reused or regular bolts without Dri-Loc are used, Meritor part no. 2297-C-7049 should be used as a thread locking adhesive. Apply the adhesive to the differential case holes only. Thread the bolts and tighten to the required torque.

IMPORTANT: Do not apply Meritor part no. 2297-C-7049 to Dri-Loc coated bolts.
Refer to Meritor Maintenance Manual 1 for complete procedure.

NOTE: THREAD LOCKING LIQUID/DIFFERENTIAL CASE HALVES

When assembling differential case halves in Meritor axles, a thread locking adhesive should be used. The recommended procedure is as follows:

1. Wipe excess oil and residue from the threaded holes in the case. The holes should be relatively oil free.
2. If new bolts are being used, a yellow coating of Dri-Loc should appear on the threads. Assemble the case with these coated bolts to the required torque.
3. If the original bolts are reused or regular bolts without Dri-Loc are used, Meritor part no. 2297-C-7049 should be used as a thread locking adhesive. Apply the adhesive to the differential case holes only. Thread the bolts and tighten to the required torque.

IMPORTANT: Do not apply Meritor part no. 2297-C-7049 to Dri-Loc coated bolts.

Refer to Meritor Maintenance Manual 1 for complete procedure.

NOTE: THREAD LOCKING LIQUID/DIFFERENTIAL CASE HALVES

When assembling differential case halves in Meritor axles, a thread locking adhesive should be used. The recommended procedure is as follows:

1. Wipe excess oil and residue from the threaded holes in the case. The holes should be relatively oil free.
2. If new bolts are being used, a yellow coating of Dri-Loc should appear on the threads. Assemble the case with these coated bolts to the required torque.
3. If the original bolts are reused or regular bolts without Dri-Loc are used, Meritor part no. 2297-C-7049 should be used as a thread locking adhesive. Apply the adhesive to the differential case holes only. Thread the bolts and tighten to the required torque.

IMPORTANT: Do not apply Meritor part no. 2297-C-7049 to Dri-Loc coated bolts.

Refer to Meritor Maintenance Manual 1 for complete procedure.

NOTE: THREAD LOCKING LIQUID/DIFFERENTIAL CASE HALVES

When assembling differential case halves in Meritor axles, a thread locking adhesive should be used. The recommended procedure is as follows:

1. Wipe excess oil and residue from the threaded holes in the case. The holes should be relatively oil free.
2. If new bolts are being used, a yellow coating of Dri-Loc should appear on the threads. Assemble the case with these coated bolts to the required torque.
3. If the original bolts are reused or regular bolts without Dri-Loc are used, Meritor part no. 2297-C-7049 should be used as a thread locking adhesive. Apply the adhesive to the differential case holes only. Thread the bolts and tighten to the required torque.

IMPORTANT: Do not apply Meritor part no. 2297-C-7049 to Dri-Loc coated bolts.

Refer to Meritor Maintenance Manual 1 for complete procedure.

NOTE: THREAD LOCKING LIQUID/DIFFERENTIAL CASE HALVES

When assembling differential case halves in Meritor axles, a thread locking adhesive should be used. The recommended procedure is as follows:

1. Wipe excess oil and residue from the threaded holes in the case. The holes should be relatively oil free.
2. If new bolts are being used, a yellow coating of Dri-Loc should appear on the threads. Assemble the case with these coated bolts to the required torque.
3. If the original bolts are reused or regular bolts without Dri-Loc are used, Meritor part no. 2297-C-7049 should be used as a thread locking adhesive. Apply the adhesive to the differential case holes only. Thread the bolts and tighten to the required torque.

IMPORTANT: Do not apply Meritor part no. 2297-C-7049 to Dri-Loc coated bolts.
Refer to Meritor Maintenance Manual 1 for complete procedure.

NOTE: THREAD LOCKING LIQUID/DIFFERENTIAL CASE HALVES

When assembling differential case halves in Meritor axles, a thread locking adhesive should be used.
The recommended procedure is as follows:

1. Wipe excess oil and residue from the threaded holes in the case. The holes should be relatively oil free.
2. If new bolts are being used, a yellow coating of Dri-Loc should appear on the threads. Assemble the case with these coated bolts to the required torque.
3. If the original bolts are reused or regular bolts without Dri-Loc are used, Meritor part no. 2297-C-7049 should be used as a thread locking adhesive. Apply the adhesive to the differential case holes only. Thread the bolts and tighten to the required torque.

IMPORTANT: Do not apply Meritor part no. 2297-C-7049 to Dri-Loc coated bolts.
Refer to Meritor Maintenance Manual 1 for complete procedure.

NOTE: WITH THE EXCEPTION OF THE PARTS SHOWN, THE REMAINING COMPONENTS ARE IDENTICAL BETWEEN THE 3200-R-1162 AND THE 3200-M-1235.

OPTIONAL EXTERNAL OIL PUMP

The 3200-M-1235 incorporates the external oil pump. The 3200-M-1235 is the same as the 3200-R-1162 except the carrier housing on the 3200-M-1235 is machined to accept the pump. Due to the pump application, the carriers are non-interchangeable.

NOTE: THREAD LOCKING LIQUID/DIFFERENTIAL CASE HALVES

When assembling differential case halves in Meritor axles, a thread locking adhesive should be used. The recommended procedure is as follows:

1. Wipe excess oil and residue from the threaded holes in the case. The holes should be relatively oil free.
2. If new bolts are being used, a yellow coating of Dri-Loc should appear on the threads. Assemble the case with these coated bolts to the required torque.
3. If the original bolts are reused or regular bolts without Dri-Loc are used, Meritor part no. 2297-C-7049 should be used as a thread locking adhesive. Apply the adhesive to the differential case holes only. Thread the bolts and tighten to the required torque.

IMPORTANT: Do not apply Meritor part no. 2297-C-7049 to Dri-Loc coated bolts.

Refer to Meritor Maintenance Manual 1 for complete procedure.

ARVINMERITOR AFTERMARKET PARTS WARRANTY

We warrant all new parts for one year from date of shipment to the buyer against defective material or workmanship (but not against damage caused by accident, abuse or improper installation, maintenance or repair) when such parts are used on vehicles the specifications of which have been approved by our Engineering Department.

As the exclusive remedy under this warranty, we will, at our option, repair or replace such parts free of charge, or take back the nonconforming parts and refund the monies paid by buyer for such parts, if found on examination by us to be nonconforming and if any necessary return charges are prepaid.

If it is necessary to return any parts under this warranty, buyer agrees not to make any deduction on account thereof from remittances on current accounts while claims are in the process of disposition. Any expense incurred without our consent for repairs or replacement will not be allowed.

THIS WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES OR CONDITIONS, EXPRESS, IMPLIED OR STATUTORY, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE. IN NO EVENT SHALL SELLER BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES OF ANY NATURE.

Only genuine ArvinMeritor replacement parts are covered by this aftermarket parts warranty.

Information contained in this publication was in effect at the time the publication was approved for printing and is subject to change without notice or liability. ArvinMeritor reserves the right to revise the information presented or discontinue the production of parts at any time.
